541690

CORPORATE OVERVIEW

DNA+ helps organizations establish accountable ownership, controlled change, and verifiable execution across complex operational environments. Built upon more than four decades of engineering, operational, logistics, maintenance, and lifecycle management experience, DNA+ delivers governance architecture, configuration management, systems integration, readiness assurance, and distributed manufacturing enablement for government and commercial organizations. DNA+ complements existing enterprise investments while strengthening accountability, traceability, readiness, and execution across organizational boundaries.

CORE CAPABILITIES

- Governance Architecture
- Configuration Management (CM2 / EIA-649)
- Enterprise Systems Integration
- Digital Engineering
- Lifecycle Sustainment & Readiness Assurance
- Data Governance & Traceability
- Operational Transformation
- Distributed Manufacturing Enablement
- Effectivity & Change Management
- Workforce Credentialing Concepts

KEY DIFFERENTIATORS

• Certified SDVOSB Leadership • Founder with 40+ Years Engineering & Operational Experience • U.S. Coast Guard Chief Warrant Officer (Ret.) • Governance at the Point of Execution • Verifiable Execution & Auditable Lineage • CM2 & EIA-649 Aligned Practices • Supports Distributed Manufacturing Ecosystems • Scalable from Local Work Centers to Enterprise Environments • Complements Existing Enterprise Investments

PAST PERFORMANCE

U.S. Coast Guard (Ret.) – Chief Warrant Officer (WEPS)

Engineering leadership, mission-system sustainment, maintenance management, readiness assurance, configuration control, and lifecycle support.

Naval Engineering & Fleet Support

Engineering support, logistics integration, sustainment planning, fleet support, and technical readiness.

Enterprise Systems Leadership

Telecommunications, systems integration, operational support, technical governance, and organizational transformation.

INNOVATION & CONTRACTING

DNA+ incorporates proprietary governance methodologies that support accountable ownership, controlled change, verifiable execution, and trusted outcomes across complex operational environments. The framework complements existing enterprise investments while improving accountability, traceability, and execution.

Engagements may be executed through Robert E. LaFond (Certified SDVOSB Sole Proprietorship) or DNA+ LLC depending upon customer requirements, contract strategy, and work scope.
